DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed July 30, 2004 have been acknowledged,

2. Examiner acknowledges amended claims 14, 22-23 and 39-40.

3. Examiner acknowledges newly added claims 41-43.

4. Examiner acknowledges applicant's submission of the terminal disclaimer.

5. The rejection of claims 14-28 and 38-40 under double patenting as being obvious over Stuckey et al., U.S. Patent Number 6,344,268 is withdrawn due to applicant's submission of the terminal disclaimer.

6. The rejection of claims 14-28 and 38-40 under 35 U.S.C. 103(a) as being unpatentable over Stuckey et al., U.S. Patent Number 6,344,268 in view of Jambois, U.S. Patent Number 6,197,412 is withdrawn due to applicant's argument.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 14-28 and 38-43 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8, 12, 20-23 and 25-27 of copending Application No. 10/441,530. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications recite a polymer composite building material comprising: a composite reinforcement comprising filaments of fibers substantially oriented in at least a first direction substantially continuously along the entire length of said building material, and disposed with a thermoplastic matrix; and capstock polymeric material disposed substantially over and in direct contact with said composite reinforcement; said building material being resistant to corrosion.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Arguments

9. Applicant's arguments with respect to claims 14-28 and 38-43 have been considered but are moot in view of the new ground(s) of rejection.
